Superior **Sanitising** Solutions

At Demon Clean our ethos is to produce and supply innovative, branded, no compromise fully tested and certified sanitising products. The quality of our products is 2nd to none.

We have a robust supply chain management process in place, which absolutely ensures that you will always receive your products without you having to be concerned with supply shortages or deliveries not turning up on time. One more thing off the to do list!

About our products

Our 70% alcohol gel hand sanitiser is made in the EU using denatured, medical grade alcohol. It is fully compliant to all EU standards, tested and certified EN1500:1997. Our GEL is manufactured to the approved W.H.O recipe and covers all requirements set out by the W.H.O.

Unlike many lesser products that have found their way on to the market, Demon Clean hand gel is made without compromise, has a lovely consistency, is super fast absorbing/non sticky and contains Aloe Vera so is a little gentler on the skin.

Antibacterial Wipes

Our sanitising hand and surface wipes have a unique alcohol and BZK formula for a double strength punch on viruses and bacteria, are pleasantly fragranced and gentle on your hands. Tested and certified to EN1276 and EN1650. Packed in resealable flow wrap packs of 102 wipes.

D-Bomb

Kills 99.99% of viruses and bacteria in the air and on surfaces with one click.

This is a highly effective single release room treatment.

- 1.1** Simple single click operation, one click enables you to activate a specialist valve and nozzle which disperse the contents in the form of a mist, essentially fogging the room.
- 1.2** Contains considerably more than 61% Ethanol, the minimum recommendation by the British Government to kill Coronavirus within minutes.
- 1.3** Eliminates Coronaviruses and sanitises all upholstery and work surfaces - including door handles & light switches.
- 1.4** Saves time and cost on your sanitising and decontamination procedures.
- 1.5** This product is complete with a child safe locking cap for additional peace of mind.
- 1.6** Instantly reduces the potential for widespread contamination across rooms and regularly used environments.

Our Sanitiser Stations

- Free Standing Foot Operated Station
- Can be branded with school crests, logos, mottos etc
- Easily refillable with our 5L alco gel, non rinse sanitiser
- Hold 2 x 5L of sanitiser, 7200 doses - making them ideal for high traffic/usage areas
